# ADOPTED BUSINESS AND TECHNICAL SOLUTIONS

Suncode has delivered and implemented the system for business process management Plus Workflow to Gerresheimer Bolesławiec company. The scope of the implementation was the process of electronic invoice flow along with the integration with SAP. The main purpose of the implementation was operation cost reduction and work enhancement. Plus Workflow is now used for making cost commitments. The system downloads data from SAP and automatically posts documents with reference to many accountant dimensions and business units. The project has also included the implementation of an interface to SAP system in terms of matching invoices with an order and downloading basing data concerning both contractors and posted documents. Due to the FI module, full accounting of invoices without a pinned order in SAP is possible as well.

Developed and implemented cost and accounting division mechanism between 3 administrative departments enables the usage of the system in many fields and in many factories. Monthly, Plus Workflow processes over a thousand of invoices and accompanying administrative documents. Trainings undergone by the users, administrators and scanning station operators has facilitated them full usage of the Plus Workflow system abilities.

*From the very beginning, the cooperation with Gerresheimer company has been characterized with big engagement and professional approach of the project team. Now, our partnership develops and both sides are content – Patryk Pozorski, Business Account Manager.*

Highly advanced technical and substantial collaboration with the Bolesławiec company has facilitated the right productive start of the system which resulted in the feeling of satisfaction from professional partnership in both Suncode's and Gerresheimer's teams. The cooperation ensures cost reduction and processes of cost commitments enhancement, as well as manual work reduction.

*The implementation of Plus Workflow has met our expectation and technical and business goals concerning business process enhancement. Suncode's services are highly advanced both in terms of technical aspect and substantial one. – Karolina Witkowska, IT Project Manager*
